Re: Marlette Production of Energy Star homes

Dear Richard,

There is no other way to say this but say Marlette Homes continues to excel in the awards department. Each year we compile annual production numbers for all the regional manufacturers participating in the Northwest Energy-Efficient Manufactured Home Program. Based on 2007 year-end numbers, Marlette Homes leads the region in production of *Energy Star* homes. Here are the rankings for the past ten years:

2007, Marlette ranked # 1 for number of homes produced under the NEEM program
2006, Marlette ranked # 1 for number of homes produced under the NEEM program
2003, Marlette ranked # 1 for number of homes produced under the NEEM program
2002, Marlette ranked # 1 for number of homes produced under the NEEM program
2001, Marlette ranked # 1 for number of homes produced under the NEEM program
2000, Marlette ranked # 1 for number of homes produced under the NEEM program.
1999, Marlette ranked # 1 for number of homes produced under the NEEM program.
1998, Marlette ranked # 1 for number of homes produced under the NEEM program.
1997, Marlette ranked # 2 for number of homes produced under the NEEM program.

Marlette's commitment to energy efficiency and Marlette's commitment to success insure that homeowners save thousands of dollars in energy costs, and the demand on the region's limited power supply is significantly reduced. Marlette's commitment to quality is reflected in your *Energy Star* production leadership. Thank you for that commitment. Congratulations.

Sincerely,

Thomas Hewes

Manager for the Northwest Energy-Efficient Manufactured Home Program
Oregon Department of Energy
